DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-33 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-33 of prior U.S. Patent Application No. 2005/0186463. This is a double patenting rejection.

3. Claims 1-33 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-33 of copending Application No. 11/085,042. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

4. Claims 1-33 are directed to the same invention as that of claims 1-33 of commonly assigned 11/085,042. The issue of priority under 35 U.S.C. 102(g) and possibly 35 U.S.C. 102(f) of this single invention must be resolved.

Since the U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership

Art Unit: 1745

(see MPEP Chapter 2300), the assignee is required to state which entity is the prior inventor of the conflicting subject matter. A terminal disclaimer has no effect in this situation since the basis for refusing more than one patent is priority of invention under 35 U.S.C. 102(f) or (g) and not an extension of monopoly.

Failure to comply with this requirement will result in a holding of abandonment of this application.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(f) he did not himself invent the subject matter sought to be patented.

6. Claims 1-33 are rejected under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter. This application has 2 inventors, Olav Finkenwirth and Bernd Kuhn whereas US 2005/0186463 has 3 inventors, the same 2 and additionally Hans-Rainer Zerfass.

7. Claims 1, 3, 6-7, 25-2632-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Jansing et al. (WO 96/17394).

Jansing et al. teaches a fuel cell with a solid electrolyte, the electrolyte is mounted between 2 metal flanges (30 and 30') whose surface is at least partially coated

with stabilized zirconium oxide (51,52) or a similar gas-tight ceramic material with a crystalline structure that solidly adheres to the flanges.

Specification

8. The incorporation of essential material in the claims or specification by reference to a Material Number is improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

Claim Rejections - 35 USC § 112

9. Claim 14 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 is rejected because it is unclear what is meant by "composed of Material Number 1.4765 or 1.4767". Also because the incorporation of essential material in the claims by reference to a Material Number is improper. This makes the claim vague and indefinite.
